

ON YOUR WAY

You're Ready – Let's Take the Next Step

1

STEP 1: GET A 360° PANORAMIC X-RAY

- Visit your local dentist or radiology clinic
- Kindly request a full-mouth 360° panoramic x-ray

You can let them know it's for a second opinion or overseas treatment planning

This won't affect your ongoing care with them – it just gives our specialists a clear view of your dental structure.

2

STEP 2: TAKE 4 CLEAR PHOTOS OF YOUR TEETH

Use your phone and good lighting. Take:

- One photo of your teeth biting together (front view)
- One photo of your top teeth
- One photo of your bottom teeth
- One full smile photo

Try to follow the example images we send you for the best results.

3

STEP 3: SEND EVERYTHING TO US ON WHATSAPP

- Send your x-ray and 4 photos to our team via WhatsApp:

[SEND YOUR PHOTOS & XRAYS -CLICK HERE](#)

Also include:

- Your ideal travel dates
- Your departure city
- Preferred length of stay
- Any specific needs or questions

Once we receive your info, we'll be in touch with a personalised plan, including treatment options, timelines, and pricing.

You're one step closer to your new smile. Let's do this together.

LET'S GET STARTED!

To kickstart the assessment, we need the following photos.

All photos are confidential and only shared with our medical consultant.

They're super helpful for our team to get a clear picture and offer you the best advice.
